If you want a career in healthcare that is integral to Infection prevention and patient safety, Sterile Processing could be for you.

Sterile Processing Technician is the core department within a healthcare facility in which medical/surgical supplies and equipment, both sterile and non-sterile, are decontaminated, processed, sterilized, stored and used for patient care.

The Sterile Processing Technician program at Central Coast College prepares you to enter a vital part of healthcare in just 34 weeks.

Total Weeks in Program: 34 weeks

Semester Credit Hours: 26 hours

Total Clock Hours: 686 (classroom: 200 | lab: 230 | externship: 256)

Program Overview

Sterile Processing Technicians are responsible for many vital services within various healthcare facilities. Some responsibilities include: Decontamination procedures, preparation and packaging for sterilization, monitoring the process of steam, dry heat, and liquid chemical sterilization maintaining product sterility through shelf-life/rotation, storage distribution, inspection, and inventory control of supplies, instruments and equipment. Upon completion of this course, graduates will be prepared to take the Certified Registered Central Service Technician's exam through HSPA. Students are awarded a technical certificate of completion upon successful completion of the curriculum.

Professionally trained Central Sterile Processing Technicians work in a variety of environments. Graduates can look forward to an exciting career in hospitals, outpatient, and dental surgery centers. There are no pre-requisites for this program.

Accreditation & Approval

Central Coast College is accredited by the Accrediting Council for Continuing Education & Training (ACCET) - A Partnership for Quality® ACCET is listed by the U.S. Department of Education as a nationally recognized accrediting agency.
